Cisco TRAINING AND CERTIFICATIONS

www.globalknowledge.dk/cisco

CISCO LEARNING PARTNER OF THE YEAR 2016

cisco Learning Specialized Partner

Global Knowledge®

As global leader in the provision of network solutions and services, Cisco plays an important role in the connection between humans and things. Cisco facilitates improved mutual communication and collaboration. In addition, Cisco hardware, software and services are implemented to create intelligent, manageable, scalable and secure infrastructures.

In order to use Cisco solutions to maximum effect, an excellent understanding of the product is required. Global Knowledge provides this knowledge with courses and certification pathways directly related to the network solutions and related technologies provided by Cisco.

PROFESSIONAL AND PERSONAL GROWTH

Do you have personal and/or professional goals you hope to achieve? Are you interested in competency-focused growth? A Cisco training course at Global Knowledge will help you achieve your goals. Whether you have ambitions in the field of Routing & Switching, Wireless, Cloud, Security, Datacenter, Service Provider or Collaboration - Global Knowledge is the largest Cisco Learning Partner in the world, and provides a complete selection of Cisco training courses, studies, and workshops at various locations in Denmark. Because of its broad range of courses and teaching methods, Global Knowledge is your ideal partner in acquiring the Cisco knowledge you need, and achieving the related Cisco certification of your choice.

CLOSE COLLABORATION WITH CISCO

Thanks to our highly qualified trainers, a flexible approach, and our partnership with Cisco, Global Knowledge has a leadership position in the training of customers and Partners in the latest Cisco technology. Global Knowledge constantly invests in the development of course curricula and remote lab facilities. These investments guarantee that you will receive optimal Cisco training, based on the best course facilities, at Global Knowledge.

It is for good reason that Global Knowledge was elected as Cisco Global Learning Partner of the Year 2016!

IDENTIFY YOUR AREA OF INTEREST!

To obtain the right knowledge you must first determine your area of interest. Cisco defined four areas of interest. For each area it is possible to train and get certified at various levels.

Networking, Network Design, and Security

If you are interested in networking or network design you can help evolve an organization's infrastructure to deliver secure, reliable, and seamless user experiences in a world with many new and shifting borders. Areas of expertise in this field are Design, Network Security, Routing & Switching, and Wireless.

Voice and Collaboration Solutions

Becoming certified in Voice Technologies enables you to help people communicate more naturally, anywhere, anytime. A Cisco certified professional implementing Cisco voice and collaboration solutions can help build more effective teams across corporate boundaries, companies, and continents.

Data Center and Storage Networking

Cisco Data Center solutions accelerate service delivery, improve profitability, and reduce risk for new business model deployments. As an employee implementing a Data Center solution you will work to unify storage, computing, and network resources to simplify your data center.

Service Provider

Becoming certified in the Service Provider field will help you implement and build extensible service provider infrastructures that deliver managed services.

CISCO CERTIFICATIONS

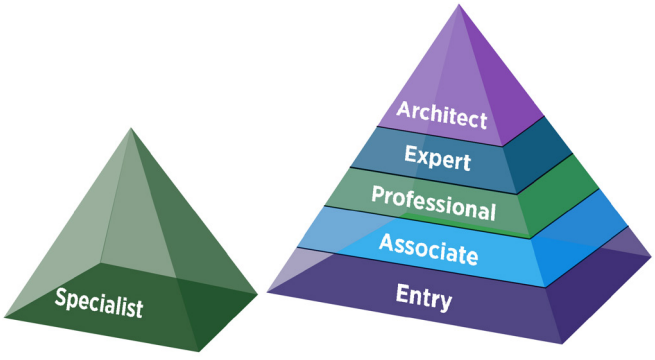
The Cisco certification program (Cisco Career Certification Program) consists of five certification levels: Entry, Associate, Professional, Expert and Architect. Within these levels, various tracks can be distinguished. You are free to select the certification track that matches your job role and field.

- **Routing & Switching**
- **Design**
- **Security**
- **Service Provider**
- **Data Center**
- **Wireless**
- **Collaboration**
- **Cloud**
- **Industrial**
- **Cyber Ops**

This brochure provides an overview of available certifications, including related courses and exams. The Architect program is not included in this overview. That highest certification level can only be achieved at Cisco.

QUALIFIED CISCO SPECIALIST

In addition to the standard certification program, you can enhance your knowledge of certain technologies through a specialized certification. A Cisco Specialist studies specific Cisco technologies in greater depth, such as Security, Data Center, Internet of Things, and Network Program Mobility.



CISCO CHANNEL PARTNER PROGRAM

If you are a Cisco channel partner, you have access to the Cisco Channel Partner Program. The program offers solutions, courses, tools and support to channel partners, necessary for successful customer service provision. Knowledge development and specialization are emphasized. In addition, the status of a Cisco channel partner provides a distinctive appeal which sets you apart from the competition.

GLOBAL KNOWLEDGE HELPS!

Because of the complexity and ever-changing demands for the Cisco Channel Program, it is a challenging and time-consuming affair for most channel partners to determine where they stand regarding the achievement and maintenance of their partner status. Global Knowledge can help you. Because of its close working relationship with Cisco, Global Knowledge is always up-to-date regarding Cisco Channel Partner requirements.

Information is implemented directly into our Fit4Business program. The Fit4Business program is an end-to-end solution which allows you to take charge of the entire certification, specialization and competency process related to your channel partner status.

If you have any questions please call us on +45 44881800 or send an e-mail to training@globalknowledge.dk. Our education advisors are happy to assist you.

CISCO CONTINUOUS LEARNING

Continuous Learning by Cisco is a supplement to the existing Cisco Partner Program. Cisco Continuous Learning encourages you, as Cisco Partner, to continue to grow and ensure that your IT knowledge is up-to-date. You are rewarded with points. These points allow you to renew your existing Cisco career certifications very easily, without being required to retake exams. You can earn points by attending workshops, classroom and/or virtual courses, e-learning modules, and watching videos.

EARNING POINTS

You can collect points by encouraging employees to participate in knowledge sessions. These points can be put to use by you, as partner, to renew your Cisco specializations. The points are valid for 12 months and must be earned in advance of renewal. After renewal, the counter is set to zero, and you will be able to start saving for the next renewal.

Global Knowledge is happy to recommend the courses you need for your partner certification, in combination with Continuous Learning. In addition, we can assist you in putting Continuous Learning to work so that you can access additional sources of income and build presales knowledge.

WHY CHOOSE GLOBAL KNOWLEDGE?

Fill skills gaps or sharpen skills

Hundreds of courses are at your fingertips for training on everything from data analysis, cyber security and cloud computing to leadership and project management.

Partnering for training strength

Global Knowledge partners with the world's leading technology leaders, including Cisco, Citrix, Microsoft, IBM, Amazon Web Services and VMware to ensure that we're not only delivering authorised training content, but adhere to their quality commitments. Added to that, we work together with leading testing providers, such as Pearson VUE and Exin, enabling us to test and verify the acquired knowledge of participants on our programmes.

Flexible

Choose from our convenient delivery formats to get the training you and your team need—where, when and how you want it. Whether it's in a classroom or online, public or private, synchronous or asynchronous, Global Knowledge has a delivery option to match your needs and preferences. Our course delivery formats enable you to balance your schedule while gaining real-world, relevant skills in a stimulating environment.

Gain practical, hands-on experience

Practice your skills and learn how to resolve real-world IT or business issues in our live lab environment.

Certainty of Quality

Global Knowledge provides official authorised training courses and study programmes given by certified instructors. This ensures that courses are taught at a consistent level, and that you comply with the strict requirements set by vendors. If you are planning to take an exam, you will be optimally prepared with the use of official courseware. Global Knowledge guarantees the highest level of positive results for a training course or study programme.

No Unexpected Charges

At Global Knowledge, the tuition fee is always clear. You know exactly what you will be paying from the start. All fees include course materials, as well as lunch and unlimited coffee, tea and water. Global Knowledge does not charge extra for registration, courseware package, or use of the location.

Schedule your class without fear of cancellation

Book your business or IT training knowing your class will run with the largest schedule of Guaranteed Dates in the industry.

Advice

If you have questions regarding a training course you are interested in, please call us on +45 44881800 or send an e-mail to Training@globalknowledge.dk.
